The rules are pretty simple. Each set includes a 15 x 15 tile Scrabble board and 100 pieces of letter tiles - with consonants and vowels. These tiles have corresponding dots. A game consists of a minimum of 2 players and a maximum of 4 players. Each gets a total of 7 tiles in their rack for each round. Using their tiles, players take a turn in word formation on the board, both sideways and down. What is the Scoring System? Each letter tile has a corresponding point value. This depends on how rare the card is and how difficult it can be to use it and put it on the board. Note that there are 2 wildcards in the bag that can be used as a representative of any letter. These blank tiles have no point values. 1 Point: A, E, I, L, N, O, R, S, T&U 2 Points: D&G 3 Points: B, C, M&P 4 Points: F, H, V, W&Y 5 Points: K 8 8 J&X 10 Points: Q & Z You'll also find score multipliers scattered across the Scrabble board. When a tile is placed in one of these squares, its value or the total value of the word will be multiplied by double or triple. How does the game end? Since there are no more tiles in the bag, and one of the players has already placed their tiles on the board, the game ends. The player with the highest score wins. Wins.
